- September 2024 - Now

Documentation & Analysis of
technical infrastructure.

About me

I'm a programmer, designer and writer from germany with about 9 years of programming experience through various personal projects.

My main focus are Full-Stack web applications but I also have experience with App, Game & Low-Level development as well as with electrical engineering & cybersecurity.

Since starting my studies I've been able to gather a large amount of knowledge about UX & UI design. In terms of design, I have also been able to gain experience with various tools like Blender & Maya for 2D & 3D modeling & animation.
